Textbook of Neurology

Your Companion for Medical School under the New Medical Licensure Act

A different kind of textbook

This practical textbook conforms to the current German Medical Licensure Act for physicians and covers all of the test material for the neurology section of the medical board examinations.

It covers the entire spectrum from neurological examinations and anamnesis through symptoms and syndromes to making diagnoses. All of the major diagnostic methods are treated as well as all neurological diseases.

- Introductions to each main chapter and before major sections summarize the basics of the subject and provide students with a context for the details presented later.
- Memory aids scattered throughout the text and short summaries help deepen understanding and enable quick, effective review.
- Comments in the margins highlight important aspects of the topic being covered.
- Typical, commonly encountered and didactically useful case studies help connect theory with practical application. – Tools that make studying fun!

2010. XXII, 760 pages. 136 figures,
64 tables. Format: 17 x 24 cm. Hardcover.

Textbook of Internal Medicine

Your Companion for Medical School under the New Medical Licensure Act

A different kind of textbook

This practical guide conforms to the current Medical Licensure Act for physicians and covers all of the test material for the internal medicine section of the medical board examinations.

In addition to the typical specialty areas it also covers topics such as problems during pregnancy, special oncology and palliative medicine, geriatrics, acute care situations, radiology and laboratory diagnostics.

- Introductions to each main chapter and before major sections summarize the basics of the subject and provide students with a context for the details presented later.
- Memory aids scattered throughout the text and short summaries help deepen understanding and enable quick, effective review.
- Comments in the margins highlight important aspects of the topic being covered.
- Typical, commonly encountered and didactically useful case studies help connect theory with practical application. – Tools that make studying fun!

2009. XXXIV, 998 pages.

The Skills of the Physician

Anamnesis, Examination, and Selected Fields of Application

Your companion for classroom, examinations and career

Haven't we all encountered the situation? Suddenly you are called upon perform a preliminary functional test of the eyes, insert a stomach tube or perform a 12-lead ECG – and you find yourself wondering, "Let's see, how did that work again?"

Forty clinicians and physicians in private practice have assembled a treasure trove of practical information:

- Anamnesis, complete physical examinations and examinations in emergency situations
- Examinations of the organs and specialty-specific examinations from pediatrics to geriatrics
- Practical skills such as arterial puncture, laying ECG lines and suture techniques
- Procedures for specific situations such as respiratory distress, cardiac arrhythmia, or unconsciousness

Whether you are a student, a freshly accredited physician, or a practicing doctor – there will always be situations in which you need to look something up quickly. This guide will be your ideal companion!

2009. XXXII, 504 pages. 364 figures, 32 tables. Format 11,5 x 16,5 cm.

Medical Dictionary | Medizinisches Wörterbuch

English – German | German – English / englisch – deutsch | deutsch – englisch

The established reference for over 50 years

For more than 50 years *Unsel's Medical Dictionary* has been an invaluable aid for professionals in all medical and scientific fields.

From AA (= Alcoholics Anonymous) to Zytotrophoblast, this lexikon contains more than 60,000 terms from all the medical and pharmaceutical specialties on 757 pages.

Even terms from the more exotic medical fields have been included.

A fundamental grasp of the foreign language is assumed, so terminological explanations have been consciously omitted. Instead, the vocabulary was selected to make this reference a useful tool not only for physicians in research and practice, but also for dentists, physiologists, psychologists, pharmacists, nurses and translators.

Conversion tables in the attachment help calculate temperatures, weights and volumes in metric and English units.

12th edition 2009. XII, 757 pages.

Format 12,4 x 19 cm. Softcover.

Medication in Pregnancy and Nursing

A Guide for Physicians and Pharmacists

Confidence in therapy and counselling

For a half a century, everyone prescribing and dispensing drugs, particularly in Germany, has been painfully aware of the potential dangers for unborn children and infants.

But sound therapy and counselling does not always mean avoiding medication altogether, but rather a sound knowledge of safe practice. This special responsibility makes it vital for physicians and pharmacists to have a reliable source of information.

Now in its 7th edition, this standard reference provides physicians and pharmacists the knowledge they need to counsel pregnant and nursing women with confidence:

- Information on embryonic development and developmental problems
- More than 1,000 medicinal substances with all of the major drugs and individual assessments
- Categorization according to the FDA and the ADEC
- Differential risk analysis on the basis of current literature
- Personal recommendations of an experienced, recognized team of authors
- from the specialties gynecology, pediatrics and pharmacology

Medication in Pregnancy and Nursing arms the reader with the tools he or she needs for confident counselling and therapy decisions.

7th completely revised edition 2009. XVI, 512 pages.

20 figures. 37 tables. 2 general maps as supplement.

Anthroposophic Drug Therapy for Physicians and Pharmacists

Focus on self-medication

In this standard reference, well-known anthroposophic physicians and pharmacists combine tested knowledge with years of experience. Healthcare professionals of all kinds will find both an easily understandable introduction as well as a expert guide for anthroposophic drug therapy and the effective use of medication.

The second update adds self-medication for disorders of the nervous, cardiovascular system and urinary systems as well as complaints during pregnancy and nursing. In addition, the authors make recommendations on how to stock home medicine chests and first-aid kits.

With this second update the work covers all aspects of self-medication.

2009. Complete work incl. 2nd supplement.

Pharmaceuticals

A Handbook for Physicians and Pharmacists

This new edition covers all drugs introduced to the market by the middle of 2009. In all, 1,500 pharmaceuticals are described, with actions, indications, dosages, undesired effects, contraindications and interactions.

Helwig-Otto has been the key to drug therapy for three generations. Independent, up-to-date and reliable, it is an indispensable aid for pharmacists and physicians.

»The comprehensiveness and continual updates of this standard reference fully justify the high price and make it an indispensable tool for physicians and pharmacists. We can recommend it without reservations.«

Latin for the Healthcare Professions

An Introduction

Medical terminology made easy

On the job, communications must be quick and clear. The prerequisite is a grasp of the right terminology.

This compact book explains the basic fundamentals of Latin grammar and medical terminology – and makes them clear, easily understandable and easy to remember. The reader will learn about prefixes, suffixes and word stems in the context of the body and its diseases in order to be able to answer questions like:

- What does postoperative hyperparathyroidism mean?
- What is hyperhidrosis?
- What do prophylaxis, provocation and prolapse have in common?

Along the way, the reader will find out all sorts of things about foreign words or adopted terms that have found their way into our everyday language: supermarket and sympathy, prelude and president, problem, product and prosthesis, epoch, hypothesis and interest. This book will pique the reader's interest and prove that Latin doesn't have to be boring!

New in this edition: review section »The Top Forty« and »A Short Look at the Names of Medicinal Plants.«

3rd revised edition 2010. 136 pages. 27 figures.

Pocket Guide to Complementary Medicine

Recommendations for Self-Medication

Therapeutic diversity

The reader will find a wealth of information on over 100 diseases that can be self-treated:

- Recommended preparations from a variety of therapeutic schools of thought
- Phytotherapy
- Homeopathy
- Anthroposophic medicine
- Schüssler cell salts
- Spagyrics
- Bach flower remedies and
- Recommendations from traditional medicine

In addition, the book provides numerous additional tips and explains when a visit to the doctor is advisable.

»This pocket-sized reference lists preparations from complementary medicine by indication. All can be recommended to patients for self-medication or to support treatment. In addition, the corresponding options from traditional medicine are noted, making it easy to find the right therapy combination.« *Ärzte-Woche No. 25, June 18, 2009*

The Science of Personal Care Products

Feel good in your own skin!

The popularity of »wellness« means that the skin and body care product market is booming as well. But individual recommendations require sound knowledge, because personal care is also health care.

In order to find the right product from among the confusing jungle of options, many customers rely on expert guidance from their pharmacy. The author provides the necessary fundamentals from A as in anti-aging to Z like T-zone skin care – comprehensive, easy to understand, and up-to-date with the latest findings and developments.

This tried-and-true textbook for pharmaceutical technicians thoroughly covers the subject of personal care and is a trusty companion for pharmaceutical assistants on the job.

Calendar for Pharmacists 2010

The »Illustrated Calendar for Pharmacists« in Its Sixty-Ninth Year

With its large-format color plates, this year's calendar once again presents twelve interesting objects from the world of historical pharmacies. Covering a timespan of five centuries, they show just how broad the spectrum of topics in the history of pharmacy really is. In part presented for the first time ever, the objects displayed on these pages come from private and public collections. Clearly written essays explain their significance in the cultural history of the pharmaceutical sciences and provide collectors with new impulses for the assessment of their own pieces.

January: Pewter Jar for Ethereal Oils • **February:** Spindle Press from the 17th Century • **March:** Pharmacy Beer Mug • **April:** Night-Blowing Cereus • **May:** Wooden Jars for Herbal Drugs • **June:** The Quacksalver • **July:** Coloured Apothecary Jars • **August:** Biblical Botany • **September:** Portrait of a Pharmacist • **October:** Designs for a Pharmacy Dispensary • **November:** Jars and License of the Lion Pharmacy in Havelberg • **December:** Mary Magdalene with the Jar of Ointment

2009. Twelve four-color prints on art paper with calendar and, on the reverse, detailed descriptions and suggestions for further reading. Colored title page. Size 49 by 49 cm. Spiral bound with eye for hanging up the calendar.

Chemistry II

Short Textbook of Organic Chemistry

Ready for tests and board exams

Closely following the material covered in the Pharmacy I section of the board examinations, this book presents fundamentals and special examination material for organic chemistry. The revised 8th edition highlights essential content for quick, effective studying and review and provides commentaries on current multiple choice questions from the catalog of examination questions.

In combination with the companion Board Review Workbook, the Short Textbook Chemistry II helps pharmacy students prepare themselves for both semester exams in organic chemistry and the first section of their pharmacy board examination.

Innovative Dosage Forms

A Textbook for Classroom and Practice

The smart approach to dosage forms

Sophisticated manufacturing processes and new excipients pave the way for intelligent dosage forms with fascinating possibilities:

- Liposome packages, for example, can smuggle peptides past the body's biotransformation armada.
- Magnetized aerosols go directly to the target site.
- Matrix-embedded active ingredients create individually tailored release profiles.

Thirty-one internationally recognized experts from universities and industry have compiled brand-new findings in this reference work.

Addiction: The Silent Epidemic

Misuse and Dependency on Medication

Help for the medication-dependent

In Germany alone almost 2 million persons are addicted to prescription medication. From an epidemiological standpoint, medication dependency has reached the same dimensions as alcoholism, but it is often overlooked. The author's goal is to raise awareness for this „silent epidemic“ by naming the most important prescription drugs and their addiction potential, pointing out dangers and showing possible solutions. In addition, he introduces the model that he designed to help physicians and pharmacists join forces to help patients escape addiction. Doctors and pharmacists can help medication-dependent patients recover control over their lives.

With a foreword by Sabine Bätzing, member of the German parliament and federal commissioner against drug abuse.

Biogenic Poisons

Biology, Chemistry, Pharmacology, Toxicology

The fascinating world of natural toxins

Poisonous substances can mean an edge on survival. Not just a danger to humans, they are also an immeasurable source of versatile substances:

- Taxol from the yew tree, once the medieval symbol of death, is now employed in cancer therapy.
- Clavine alkaloids from ergot, which can be an impurity in grain and bread, can lead to ulcers and gangrene in the extremities, but can also be used in migraine therapy or obstetrics.

The team of authors has assembled all of the important facts in text and illustrations about the toxins in microorganisms, fungi, plants and animals, their history, structure, effects, toxicology, poisoning symptoms, possible treatment and medicinal uses. In addition, over 8,000 citations point the reader to a treasure trove of original articles and reviews for further reading.

3rd revised and enlarged edition 2010.

A methodological guide using migraine as an example

By Dr. Klaus Gerlach, Oelsnitz/Erzgebirge.

2009. € 49,-- [D]. Prepublication price valid until 31.01.2010: € 44,00 [D]
ISBN 978-3-7692-4773-2

This team seminar on advising patients about self-medication lays the groundwork for effective patient counselling. Using the example of migraine, the course shows how a counselling interview can be structured, which questions must always be clarified with the patient, how the pharmacist's recommendations affect the pharmacy's range of products, etc.

Hazardous Substances in Drug Formulation

Evaluation of dangers and practical work guidelines

By Dr. Holger Herold, Leipzig.

2009. € 49,-- [D]. Prepublication price valid until 31.01.2010: € 44,00 [D]
ISBN 978-3-7692-4775-6

This team seminar on hazardous substances in drug formulation interprets the laws on hazardous substances that are relevant for the pharmacy, instructs employees on risk assessment, and explains the concept of hazard levels. Tried and true work guidelines can be printed and immediately put into practice in formulation.

1 powerpoint-presentation
for each title on CD with handbook.
Each: Format 12 x 18 cm in a DVD-Box.

Team Seminars in the Pharmacy

Evaluating and Avoiding Interactions

Focus on self-medication

By Tobias Hückel, Dresden

2009. € 49,-- [D]. Prepublication price valid until 31.01.2010: € 44,00 [D]
ISBN 978-3-7692-4774-9

This team seminar on interactions uses practical examples to introduce the course participants to the interactions module of the ABDA database and makes them aware of the most important interactions. It also takes a look at how drugs and food can interact. The author also includes the often neglected OTC medications.

An In-Depth Look at Hay Fever

By Dr. Wolfgang Strölin, Esslingen.

2009. € 49,-- [D]. Prepublication price valid until 31.01.2010: € 44,00 [D]
ISBN 978-3-7692-4777-0

This team seminar on hay fever answers important questions such as,
»Which allergens trigger hay fever?«
»Is there a causative treatment for hay fever?«
»What active ingredients can alleviate the annoying symptoms of hay fever?«

An In-Depth Look at Acid Stomach

By Dr. Wolfgang Strölin, Esslingen.

2009. € 49,-- [D]. Prepublication price valid until 31.01.2010: € 44,00 [D]
ISBN 978-3-7692-4776-3

This team seminar on acid stomach answers important questions such as,
»What are the causes of acid reflux and heartburn?«
»Is there a causative treatment for acid stomach?«
»What active ingredients can alleviate the troubling symptoms of acid stomach?«

1 powerpoint-presentation
for each title on CD with handbook.

Mathematics for the Clueless

The Student's Guide

Pythagoras, we have a problem ...

Mathematics, the final frontier. These are the voyages of the clueless many. Their mission: to explore a strange mathematical universe. Yára Detert takes the helm and steers you through the asteroid field of numbers and formulas – where you might even find yourself having fun!

From the contents:

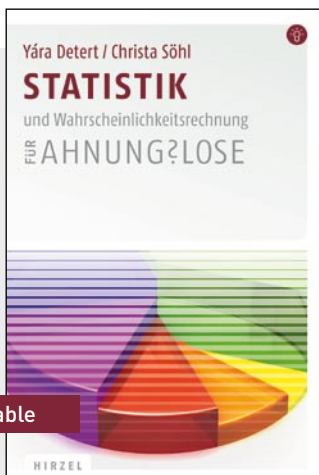

Fundamentals - Units - Fractions - Binomial formulas - Trigonometry - Calculating volume - Powers and roots - Logarithms - Calculus - Functions - Curve sketching - Extremum problems - Differential equations - Integral calculus - Complex numbers - Linear algebra - Vectors / Linear equation systems and matrices - Analytic geometry with lines, planes, circles and spheres

2nd edition 2010.
XII, 228 pages. 131 figures.
7 tables. Softcover.

€ 28,-- [D]
ISBN 978-3-7776-1679-7

Statistics for the Clueless

The Student's Guide

Do not trust any statistics ...

How can the really important information be distilled out of a heap of unintelligible numbers?

The authors of this book are able to explain the most important statistical methods clearly and with practical examples. The many review exercises give the reader a feel for which method must be used when and how the results can be interpreted and depicted.

From the contents:

Probability calculations - Laplace variables - Mapping rules - Combinatorial problems - Random values and their distribution - Binomial distribution - Bernoulli experiments - Expected values - Variance and standard deviation - Sigma rules - Working with tables - Evaluative statistics - Testing hypotheses - Chi square test - Other distributions - Geometric distribution - Hypergeometric distribution - Poisson distribution - Normal distribution - Exponential distribution - Graphical representation - Diagram types - Distortion through graphical representation

2010. X, 124 pages.
61 figures. 17 tables.

Organic Chemistry for the Clueless

The Student's Guide

Carbon rules!

The element carbon is the foundation of all biological material. Although the number of organic compounds ranges in the millions, there are a few select principles that make it possible to understand most of these compounds and their reactions. Katherina Standhartinger, the author of the bestseller »Chemistry for the Clueless«, guides the reader through the astounding and fascinating world of carbon compounds and leaves out all the unnecessary details that complicate the big picture - to make sure that you don't miss the forest for the trees.

From the contents:

Atomic shells - Atomic structure - Bonds - Hydrocarbons - Oxygen compounds - Biomolecules - Nomenclature - Homologous series - Reactions - Mesomerism - Isomerism - Chirality - Stereochemistry - Optical activity

2010. XII, 138 pages.
150 figures, 35 tables. Softcover.

Audio Engineering for Special Events Technicians

in training and on the job

Who's afraid of SNR - LFO - BPM - FOC - MSB - VHF - PWM?

We all know that audio engineering is more than just acronyms. But what do they all mean? This practical textbook is designed to meet the special needs of events technicians. The textbook stands out from the crowd because it is designed specifically with the university curriculum and professional needs in mind, making it not only an excellent companion in the classroom, but a useful reference for on the job as well.

The author, himself an instructor for special events technicians, covers the ground from physical fundamentals of acoustics and electronics to setting up mixing consoles and sound systems, providing a multitude of useful tips without confusing the reader with extraneous details. A chapter on video technology rounds off the book. Sample calculations put the material in a practical context, and sample problems at the end of each chapter (with solutions in the appendix) help review what has been learned and inspire further thought. Entertaining guest essays provide a broader perspective.

Ageing in Germany

In January 2006 the Germany Academy of Sciences Leopoldina and the German Academy for Science and Engineering acatech founded a joint interdisciplinary academy group »Ageing in Germany« to develop public recommendations on the basis of the best scientific evidence available. The goal of these guidelines is to help make the best possible use of the opportunities provided by the considerably higher life expectancy of the last century – the »years gained« – and to deal wisely with the challenges of demographic ageing. The proceedings will be published in eight volumes. The present volume contains the recommendations of the academy group.

Founded by Germany Academy of Sciences Leopoldina and the German Academy for Science and Engineering acatech.

The Changing Image of Ageing

Historical, intercultural, theoretical and current perspectives

Edited by Josef Ehmer, Wien, and Otfried Höffe, Tübingen.

2009. 244 pages, 32 figures. Hardcover. € 24,-- [D]. ISBN 978-3-8047-2542-3

Ageing, Education and Lifelong Learning

Edited by Ursula M. Staudinger and Heike Heidemeier, Bremen.

2009. 279 pages, 35 figures, 9 tables. Hardcover. € 24,--. ISBN 978-3-8047-2543-0

Ageing, Work and the Workplace

Edited by Uschi Backes-Gellner and Stephan Veen, Zürich.

2009. 157 pages, 29 figures, 2 tables. Hardcover. € 24,-- (D). ISBN 978-3-8047-2544-7

Productivity in Ageing Societies

Edited by Axel Börsch-Supan, Mannheim, Marcel Erlinghagen, Duisburg, Essen and Bochum, Karsten Hank, Mannheim, Hendrik Jürges, Mannheim, and Gert G. Wagner, Berlin.

2009. 157 pages. 28 figures, 2 tables. Hardcover. € 24,-- (D) ISBN 978-3-8047-2545-4

Ageing in Town and Country

By Stephan Beetz, Braunschweig, Bernhard Müller, Dresden, Klaus J. Beckmann, Berlin, and Reinhard F. Hüttel, Cottbus-Potsdam.

2009. 210 pages, 10 figures, 11 tables. Hardcover. € 24,-- (D) ISBN 978-3-8047-2546-1

Ageing and Health

Edited by Kurt Kochsiek, Würzburg.

2009. 302 pages, 46 figures, 19 tables. Hardcover. € 24,-- (D) ISBN 978-3-8047-2548-5

Ageing: Family, Society and Politics

Edited by Jürgen Kocka, Berlin, Martin Kohli, Florenz, and Wolfgang Streeck, Köln.

2009. 345 pages, 44 figures, 8 tables. Hardcover. € 24,-- (D) ISBN 978-3-8047-2549-2

Years Gained. Recommendations of the Academy Group »Ageing in Germany«

Chemical Analysis of Articles and Materials in Contact with Foodstuffs

Edited by L.W. Kroh.

2007. 344 pages.

Format DIN A5.

Hardcover.

€ 99,50 + VAT

ISBN 978-3-89947-338-4

Keep food safe

Articles and packaging materials coming into contact with food have a great influence on the quality of our foodstuffs and thus on consumer safety. As a result, chemical analysis plays a growing role. Articles and materials touching food are often made of a large variety of chemical substances and materials and are complex chemical systems. They represent a great challenge for the analyst and can only be analyzed with the aid of modern methods and techniques. All of the standard methods described in this book were tested by professionals and are used in routine analysis in the respective institutions. Concrete analysis data and operating instructions for the test procedures make it easier for the analyst to quickly grasp the subject matter.

B. Behr's Verlag

The Refrigeration and Freezing of Foods

By H.-A. Kurzahls.

2007. 222 pages.

Hardcover.

Format DIN A 5.

€ 79,50 + VAT

ISBN 978-3-89947-357-5

A practical guide

What rules need to be followed when foods are cooled, frozen or deep-frozen?

What temperatures are required? How can the required cooling time be calculated? And where can the necessary data be found? This practical guide has the answers to all of these questions.

- Background information, formulas, example exercises with computation steps and solutions
- Extensive collection of data and figures on specific products as well as the specific heat capacities of packaging materials
- Especially useful: Behr's find-it-fast system! Use it to quickly jump back and forth between practical guidelines and further information.

Multiple Emulsions

Practical knowledge for the food, pharmaceutical and cosmetics industry

Edited by G. Muschiolik and H. Bunjes.

2007. 330 pages.

Format DIN A 5.

Hardcover.

€ 119,50 + VAT

ISBN 978-3-89947-339-1

Gently guiding drugs to their target in the body

How can multiple emulsions with defined characteristics be produced? Which emulsifiers are used? And which emulsion components?

Master these questions with ease with the new reference work „Multiple Emulsions.“ Let „Multiple Emulsions“ deliver the latest, successfully tested production methods straight to your desk and get to know trend-setting applications for the food, pharmaceutical and cosmetics industries. This practical guide shows you exactly how and points out what to watch out for during production. Don't pass up this chance to stay ahead of the competition.

The Handbook of Sweeteners

Edited by K. Rosenplenter and U. Nöhle. Founded by G.W. on Rymon Lipinski and H. Schiwiek.

2nd completely revised edition 2007. 612 pages.

Format 16,7 x 24,8 cm.

Hardcover.

€ 129,50 + VAT

ISBN 978-3-89947-262-2

Sweeteners: What they are and what they can do

Consumers and, to an ever greater degree, lawmakers are demanding less sugar in foods. The reasons are numerous: overweight, cavities and increased health consciousness. The market potential is enormous, and so are the challenges and tasks for you as a product developer. A high degree of expertise about sweeteners is needed. You'll find it all here:

- Applications: Technology and application of all sweeteners currently on the market worldwide
- Interactions: Mixtures of sweeteners for „multidimensional“ effects
- Tools of the trade: Extensive, ready-to-use tables and data.
